BILATERAL MEETINGS

Monday (13.05h - 15.10h)

Tuesday (13.10h - 15.15h)

Wednesday (13.10h - 15.15h)

DESCRIPTION Escaux is an extremely innovative and disruptive provider of Cloud Communication technology for Fixed, Mobile and OTT networks. Its unique and break-through Unified Endpoint technology combines any communication device (mobile phone, home phone, office phone, soft phone, WebRTC and VoLTE client) into a single "Virtual Personal Communication Device" called a Cloud Phone. The Cloud Phone connects seamlessly to a corporate PBX, an OTT network or an IMS network, offering its owner the possibility to communicate using his communication identity of choice (landline number, mobile n

Offer

CARRIER AND ENTERPRISE FRIENDLY OTT APPLICATION FOR RICH COMMUNICATIONS

We offer a solution bringing rich communications features on top of existing carrier and enterprise networks. Users from different networks can communicate with each other using voice, video, chat, screen sharing ... similar to what they are used to do with OTT networks.

The difference with Skype, Viber or WhatsApp is that our solution is connected to the user's Enterprise or Telco identities ... hence offering a completely integrated user experience.

COOPERATION OFFERED

1. Technical co-operation
 2. License agreement
