Wednesday (11.05h - 13.10h)

Wednesday (13.10h - 15.15h)

Wednesday (15.15h - 16.55h)

**DESCRIPTION** Yagram is a mobile health company. Our companion app consists of a user-friendly communication channel for patients and their care providers. During the course of illness and over time, patients move between several care settings and are treated by different health care practitioners. Transitions between settings and providers put patients at higher risk of experiencing problems that lead to poor outcomes. Our objective is to enhance the care continuum during the transitional period and provide personalized clinical oversight for each individual patient. Our solution is supported by point-of-care tests in order to decrease severe events and improve patient's quality of life.

## Offer

# REMOTE MONITORING PLATFORM FOR CHRONIC DISEASES

Yagram is a mobile health company from Brussels. Thanks to our digital solutions for home monitoring we enable transitional care.

Our solutions are targeted at patients that suffer from chronic (Heart Failure, HIV and Chronic Fatigue) and high-need diseases (Pregnancy) and their care providers. □As a young company, Yagram is very eager to broaden its knowledge base and it is constantly on the lookout for new partnerships. The company warmly welcomes brainstorming invitations from potential partners that can connect multidisciplinary health care teams, patient communities, and medical research centres.

**KEYWORDS:** **MOBILE HEALTH** **REMOTE MONITORING** **CHRONIC CARE** **HEART FAILURE** **PREGNENCY** **LYME DISEASE** **SELF-MONITORING** **POINT-OF-CARE-TESTS**
